

# How to translate the ECHT website

## Safari

Step 1:

In the search bar a text cloud will be visible on the right side

Click on that and the question translate to... will show. Click on that and the language you want and the website will change in that languages.

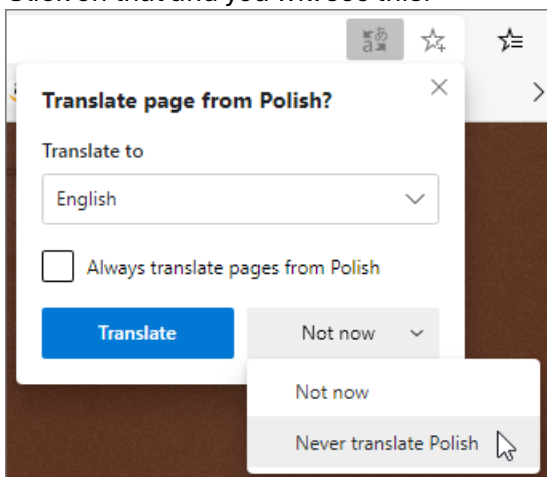

## Edge

Step 2:

In the search bar you will see this:

Click on that and you will see this:

Translate to the language you want and the website will change to that language.

## Chrome

To the right of the Search bar, click Translate

Right-click anywhere on the page and select Translate to [language].  
Select the desired language.  
If Translate does not work, refresh the web page.
